

Design and Engineering

HSI maintains state-of-the-art engineering and drafting capabilities through its commitment to application of cutting edge technology. Auto-CAD, 3-D SolidWorks, Codeware COMPRESS, and Finite Element Analysis are the high tech tools used to deliver design and engineering services.

Our expert team of engineers, draftsmen, and project managers work closely with client technical personnel to insure full compliance with all applicable codes and customer specifications. HSI's design team is very familiar with process equipment engineering and manufacturing technologies and is capable of considering all aspects of constructability when detailing a job.
